

14144 Ventura Blvd. Suite 300
Sherman Oaks, CA 91423

Position Title

Vice President of Product Development and Technology

GoTV produces and distributes original and third-party mobile television programming, distributed primarily over wireless networks and by broadband websites. We provide content through application storefronts and mobile web browsers on all mobile platforms.

Position Overview

The Vice President of Product Development and Technology is responsible for executing GoTV's technology and product strategies, maintaining the development and implementation of a product roadmap including client side (mobile phones, PDAs, smartphones, netbooks and laptops) and server-side product and production solutions (including external partner solutions for encoding, video streaming, ad-insertion, etc.). Objectives and results are met and delivered through the GoTV Networks' technology organization which consists of product management, client and server solutions development, internal production tool development, handset porting and general IT.

Additionally, the position will oversee GoTV's integration with a wide distribution network of partner vending systems including mobile network operators, application storefronts, media companies, advertising agencies, and portals.

This is a general executive management role which requires vision and highly refined management skills including, but not limited to multi-project management skills, team-building and mentoring abilities.
